

CATAPULT SPIDER - Much Sad

This is an OSINT challenge: find the flag in the publically-available information CATAPULT SPIDER has left online.

Challenge description

Challenge

×

Much Sad

We have received some information that CATAPULT SPIDER has encrypted a client's cat pictures and successfully extorted them for a ransom of 1337 Dogecoin. The client has provided the ransom note, is there any way for you to gather more information about the adversary's online presence?

NOTE: Flags will be easily identifiable by following the format `CS{some_secret_flag_text}`. They must be submitted in full, including the `CS{` and `}` parts.

Submit

We have received some information that CATAPULT SPIDER has encrypted a client's cat pictures and successfully extorted them for a ransom of 1337 Dogecoin. The client has provided the ransom note, is there any way for you to gather more information about the adversary's online presence?

NOTE: Flags will be easily identifiable by following the format `CS{some_secret_flag_text}`. They must be submitted in full, including the `CS{` and `}` parts.

Solution

We're given a file to download `muchsad.txt`:

In shibefan's repositories is one for <https://shibefan.github.io>. We can either browse through the repository and view the `index.html` of the page, or just visit <https://shibefan.github.io>:

1 DOGE = 1 DOGE

D7sUiD5j5SzeSdsAe2DQYWQgkyMUfNpV2v

CS{shibe_good_boi_doge_to_the_moon}

And there's the flag: CS{shibe_good_boi_doge_to_the_moon}

Answer

CS{shibe_good_boi_doge_to_the_moon}
